Implementing Controls & Compensating Control Attestation

Aim:

To implement security controls in Eramba and verify their audit/attestation status.

Procedure:

Step 1 — Open Internal Controls

In Eramba:

Control Catalog → Internal Controls

You should see the Internal Controls page.

Step 2 — Create the 10 controls

Click:

+ Add Item

Create the controls below:

No.	Control Name
1	Privileged Account Monitoring
2	Vulnerability Scanning
3	Patch Management
4	Firewall Management
5	Security Monitoring
6	Encryption Assurance

- 7 Employee Protection
- 8 Access Review
- 9 Incident Response
- 10 Backup and Recovery

Step 3 — For each control, fill General

Name

None
Privileged Account Monitoring

Description

None
Privileged account activity is monitored and reviewed for suspicious or unauthorized activity.

GRC Contact

None
Admin Admin

Control Operator Contact

None
Admin Admin

Related Policy

None
Information Security Policy

These details correspond to the Control Item Detail – General View shown as Fig. 5.2.

Save the control.

Step 4 — Open Privileged Account Monitoring

After creating the 10 controls:

1. Find Privileged Account Monitoring.
2. Open it.
3. Click Edit.

Step 5 — Open Audits

Inside the Edit window, select:

Audits

Step 6 — Configure the audit

Set:

Audit Date

Use:

None

2027-08-27

Then select:

Audit Owner

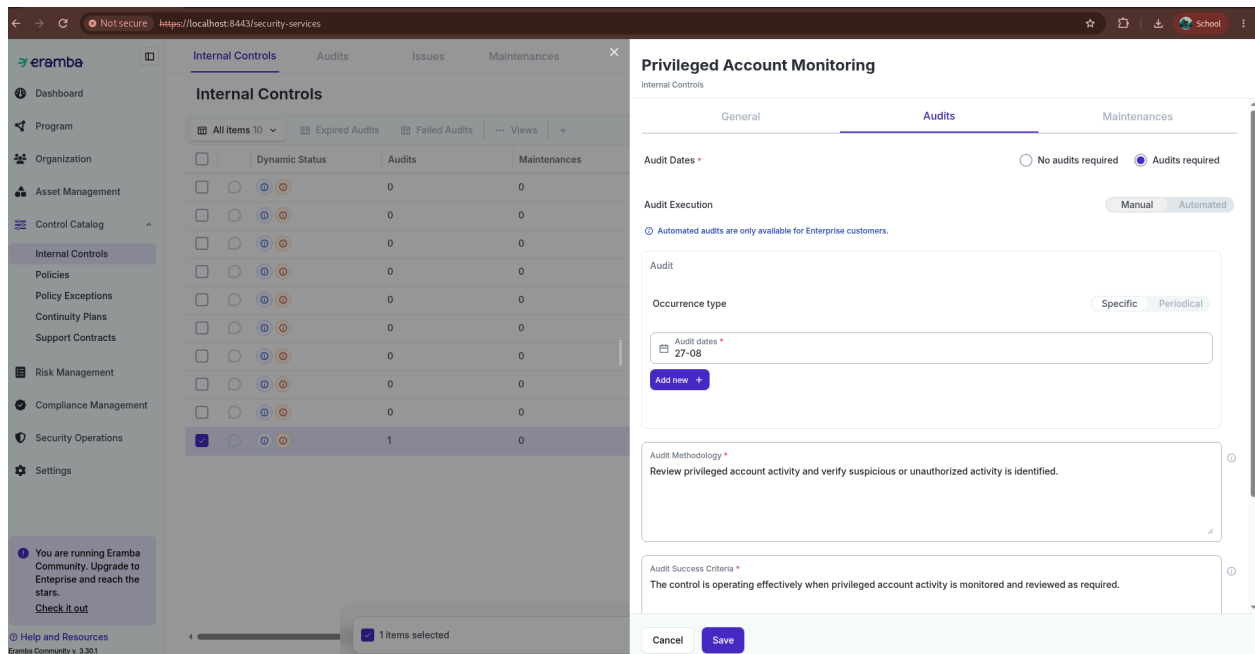

None

Admin Admin

Audit Evidence Owner

None

Admin Admin

Step 7 — Verify audit methodology

Still inside the Audits section, check the:

- Audit Methodology
- Success Criteria

Do not change these blindly.

Send me a screenshot of the Audits section and I'll tell you exactly what to select based on what your Eramba 3.30.1 installation shows.

Step 8 — Save

After configuring the audit:

Save the control.

Step 9 — Verify the control

Open Privileged Account Monitoring again.

You should be able to see the control's audit/attestation information.

Audits		
Audit Dates		2027-08-27
Audit Methodology	ⓘ	Review privileged account activity and verify suspicious or unauthorized activity is identified.
Audit Success Criteria	ⓘ	The control is operating effectively when privileged account activity is monitored and reviewed as required.

Audit Evidence Owners		 Admin

Step 10 — Verify all 10 controls

Go back to:

Control Catalog → Internal Controls

Confirm that the 10 controls are present.
