Step 6 — Save

Click Save.

Part B — Verify Business Interruption

Step 7 — Open the risk details

Open Business Interruption again.

Check General.

It should show:

None

Name: Business Interruption

Risk GRC Contact: Admin Admin

Risk Originator Contact: Admin Admin

Next Review Date: 2027-08-27

Step 8 — Check Analysis

Open Analysis.

Verify:

None

Applicable Business Unit: Operations

Likelihood: Medium

Impact: Very High

Risk Analysis Score: 6

Step 9 — Check Treatment

Open Treatment in the details view.

Verify:

None

Risk Treatment: Accept

Treatment Internal Controls:

Endpoint Protection
Backup and Recovery
Firewall Management

Treatment Policies:
Information Security Policy

Part C — Risk Exceptions

Step 10 — Open Risk Exceptions

Go to:

Risk Management → Risk Exceptions

Step 11 — Create a Risk Exception

Click:

+ Add Item

The exception needs:

- Description
- Requester
- Contact
- Expiration date
- Status

Step 12 — Create the first exception

Use:

Name

None

Reputation Damage Risk Exception

Description

None

Temporary acceptance of reputational risk while additional preventive measures are evaluated.

For the contact/requester, use:

None

Admin Admin

Status:

None

Open

Expiration date:

None

2026-09-27

Step 13 — Create 10 exceptions

10 risk exceptions.

A good set corresponding to your 10 business risks is:

- | # | Risk Exception |
|----|--|
| 1 | Reputation Damage Risk Exception |
| 2 | Business Interruption Risk Exception |
| 3 | Supplier Failure Risk Exception |
| 4 | Regulatory Non-Compliance Risk Exception |
| 5 | Financial Fraud Risk Exception |
| 6 | Data Loss Risk Exception |
| 7 | System Downtime Risk Exception |
| 8 | Malware Attack Risk Exception |
| 9 | Unauthorized Access Risk Exception |
| 10 | Data Breach Risk Exception |

For each one use:

None

GRC Contact: Admin Admin

Exception Requester: Admin Admin

Status: Open

Expiration Date: 2026-09-27
