

Exp no:3

Building Corporate Risk Register & Risk Taxonomy

Aim

To assess identified business risks qualitatively in Eramba by evaluating their Likelihood and Impact and determining the risk score.

Procedure:

Step 1 — Open Business Risks

In Eramba go to:

Risk Management → Business Risks

Step 2 — Find Business Interruption

Find:

System Downtime or yours own risk

Click the risk name to open it.

General

Dynamic Status

Risk Without Treatment

Name ⓘ

System Downtime

Description

Unavailability of IT systems may affect business operations.

Analysis

Step 3 — Open Analysis

Analysis

Applicable Business Units

Operations

Processes

Threat Tags

Threat Description

Vulnerability Tags

Vulnerability Description

Risk Analysis Classification

Likelihood (Medium)Impact (High)

Risk Analysis Score

5

Risk Analysis Threshold

Step 4 — Check Business Unit

Make sure:

None

Applicable Business Units: Operations

This is the required value in the manual.

Step 5 — Set Likelihood

Under **Risk Analysis Classification**, select:

None

Likelihood: Medium

Step 6 — Set Impact

Select:

None

Impact: High

Analysis	
Applicable Business Units	Operations

Threat Tags	
Threat Description	
Vulnerability Tags	
Vulnerability Description	
Risk Analysis Classification	Likelihood (Medium) Impact (High)
Risk Analysis Score	5
Risk Analysis Threshold	

Step 7 — Check the calculated score

Eramba should automatically calculate:

None

Likelihood = Medium = 2

Impact = Very High = 4

Risk Analysis Score = 6
